

PERMEABLE PAVERS

PERMEABLE PAVERS

Over several years, our extensive portfolio of permeable pavers has been proven via many successful project installations. Our permeable pavers mitigate stormwater flow rates and improve water quality. Enlarged spacer lugs on the sidewalls of these units create quarter-inch joints which, when filled with a properly-sized aggregate, drain water to the permeable base. This action filters stormwater, reduces peak flow rates, and can recharge groundwater sources to create a sustainable pavement option.

ECO-CITYLOCK®

The micro chamfer create a contemporary aesthetic and deliver a smooth rolling surface, making Eco-CityLock ideal for pedestrian and wheeled traffic.
